September 2022 - March 2023

UX Designer

Pocket Made

- Led, created, and owned multiple end-to-end design systems in Figma, including storyboards, wireframes, and fully interactive high-fidelity prototypes
- Collaborated with Product Owners, QA team, and Engineers in an Agile environment during all stages of design cycle
- Worked with engineering to build standardized component sets in Figma that aligned with active development frameworks and UI libraries
- Conducted design audits, research, and testing to identify opportunities for improvement and solve for pain points. Collaborated with UX Research to integrate user insights and findings into design planning and priorities
- Responsible for UX documentation and participating in developer handoff, drawing from engineering experience to suggest possible solutions when appropriate
- Worked closely with the Creative Leadership Team to ensure product visual design remains loyal to brand image and communicates clear understanding of industry-specific design patterns

BACKGROUND

I have a lifelong passion for design: I've been doing it since 2001. I love keeping up with creative trends and learning new technologies. I'm currently pursuing a bachelor's degree in Digital Media and using my background in frontend development to explore exciting avenues that bridge technology & human interaction.

I'm currently open to long-term career opportunities within a team setting. I may also consider contract and internship opportunities with the right company!

December 2021 - May 2022

Frontend Web Developer

IntuitSolutions Inc.

- Develop dynamic Ecommerce themes from Figma designs using the Stencil CLI theme engine
- Use knowledge of HTML, CSS, JS, Handlebars & JSON to develop and implement data-driven solutions
